

Andreas Rudolph

Super-intelligence orchestrator · Product engineer · Sales engineer · Digital artist · Entrepreneur

København, Denmark · onemanmobile@gmail.com · andreas-rudolph.me · linkedin.com/in/andreasrudolph · x.com/onemanmobile

Profile

Technological Product Leader, Expert Developer, App Entrepreneur, and Manager of IT Projects by drive and profession.

I have contributed to or led development on more than 20 app projects and am a self-publisher with over 1,000,000 downloads on personal projects. I studied computer science, started making apps as an Android developer, and then began leading others and broadening out into strategy and product leadership.

Today I orchestrate AI as a team to engineer products, sell them and make art. Technical leadership, mobile, web, design and cloud technology are my specialties, with deep practical experience in business development, solid estimation and marketing strategy.
